DeepRoots Bible: Facts & Figures for the Donor Presentation

Starter file prepared for Dan Williamson by Troy Winkler · November 2026 · Ready to paste into Claude with your presentation template

1. Who we reach today

- **Reach:** 78,000+ students in 384 Christian schools (2025–26 school year, invoiced accounts).
- **Loyalty:** Roughly 90% of schools renew year after year. About 390 renewals are processed each year.
- **Footprint:** Six regional sales territories serving schools nationwide.
- **Grades:** PreK–6 today. Grade 7 is rolling out now and is already in 54 schools with 84 Grade 7 teachers. PreK is planned for fall 2027.
- **Context:** Our closest school-focused peer, Summit Ministries, reports about 60,000 students in 600+ schools. DeepRoots already reaches more students.

2. Demand is growing

- **Interest:** Nearly 2,000 schools and teachers (1,973) have requested sample units through our website since 2017.
- **Trend:** Requests grew more than 3× from 2017 to the 2022 peak (296 requests).
- **Momentum:** 2026 already has 242 requests, up 58% on all of 2025 (153), and Q3 2026 was the strongest quarter on record (112 requests).
- **Vision:** Grow from about 78,000 to 350,000 students as PreK and new grades launch.

3. What makes DeepRoots different

- **Kids master Scripture through play:** Treehouse Adventure is a Scripture-memory game for grades 4–6 with a teacher progress dashboard. Of the 14 Bible curricula we reviewed, no other school curriculum offers a student game.
- **Distinctive design:** Painted Bible-epic artwork, a parent/home login, and a curriculum built to run as one sequence across all grades.
- **Positioning line:** “The Bible curriculum where kids master Scripture through play, and teachers can see it happen.”

4. The problem automation solves

- **No back end:** Our website is a brochure. Enrollment, renewals, marketing, support, editorial and reporting are all done by hand across email, spreadsheets and separate tools.
- **Manual volume:** Staff hand-logged 8,684 emails in the last 12 months. Each new school takes about 10 manual steps and 10+ hand-offs to go from “yes” to “teaching.” Each renewal passes through 15+ hand-offs.
- **Set-up load:** 4,000+ set-up tasks since April. Classroom-roster syncs average 11+ days, and in June six people handle up to 390 schools.
- **Reporting:** About 330 reports, many duplicated, so numbers differ depending on who ran them.
- **Curriculum:** Lessons are assembled by hand. Scripture is pasted and formatted manually (one study guide alone has 1,000+ verses), and versions are tracked in email.
- **No cost tracking:** The time, effort and cost each department spends has never been tracked. The new portal will measure it automatically, every day.

5. What changes, by department

Area	Today	With the DeepRoots Portal	When
New schools	10+ hand-offs; ~2 months to	Instant enquiry routing, online demos and	Dec–Feb

	close	quotes; 2–3 hand-offs	
Renewals	15+ hand-offs; some 60 days overdue	Prepared 90 days early, online renewal; 0–1 hand-offs	Dec–Jan
Set-up	5–7 days from payment to teaching	Priority queue, auto accounts, Google/Clever sign-in; 1–2 days	Dec–Feb
Finance	~5 manual QuickBooks tasks per school	Quote, invoice and payment automated; reminders at 15/30 days	Dec–Mar
Support	Email and phone, scattered history	In-app help inbox with AI sorting and self-help library	Dec–Feb
Marketing	Website changes need a developer	Self-edited site, Book a Demo, campaign tracking	Now–Feb
Leadership	~330 reports, stale when compiled	One live dashboard from website visit to renewal	Jan–Mar
Curriculum	Manual assembly and Scripture pasting	Editorial hub with auto Scripture insertion and version control	After Mar 2027

6. Return on investment (estimates)

- **Staff time:** About 960 staff hours a year returned (roughly half a full-time position), mostly in the May–August rush. This counts logged work only, so the real figure is higher.
- **Labor value:** About $24,000–$38,000 a year in staff time, at $25–$40 an hour.
- **Renewals:** Each 1-point gain in renewal rate ≈ 4 schools ≈ $13,000 a year, every year.
- **New schools:** Each new school averages about $2,267 in its first year and typically renews. Ten more schools ≈ $23,000 in year one, repeating as they renew.
- **Speed:** Payment-to-teaching drops from 5–7 days to 1–2.
- **Growth without matching headcount:** Automation lets DeepRoots grow toward 350,000 students without adding staff at the same rate.

7. Timeline

- **Milestones:** Preview November 2026 · first go-live December 2026 · department phases January–February 2027 · full handover March 2027.

8. Where donor gifts make the biggest difference

- **Finish the automation:** Complete the remaining portal phases, especially the editorial/curriculum workflow, so improvements reach classrooms faster.
- **New grades:** Finish Grade 8, launch PreK, then build Grades 9–12.
- **Engagement tools:** Expand Treehouse and the digital resources that keep kids engaged with Scripture.
- **Less reliance on owner contributions:** Donor support lets this work move faster with less dependence on the owners' own giving.
