2026 Information for a Presentation

DeepRoots Bible · Prepared for Dan Williamson by Troy Winkler · November 2026

Plain-language facts to paste into Claude with your presentation template. Yellow items are being confirmed from the new portal.

1. DeepRoots at a glance

- **Students:** **[paying students, 2026–27: number coming from the portal]**
- **Schools:** **[paying schools, 2026–27]** Christian schools across the country, served by six regional sales territories.
- **Loyalty:** About 9 in 10 schools renew every year. Once a school starts with DeepRoots, it stays.
- **Grades:** PreK–6 today. Grade 7 is already in 54 schools, Grade 8 is in development, and PreK launches in fall 2027.
- **Long-term vision:** Reach 350,000 students as new grades launch.

2. Demand is growing

- **Interest:** Nearly 2,000 schools and teachers have asked for sample units through our website since 2017.
- **Momentum:** 2026 requests are already up 58% on all of 2025, and this past summer quarter was the strongest on record.

3. What makes DeepRoots different

- **Kids learn Scripture through play:** Our Treehouse Adventure game helps students memorize Scripture while teachers watch their progress. No other school Bible curriculum we reviewed offers a student game.
- **One connected journey:** A single curriculum that builds year by year from PreK through middle school, with rich Bible-story artwork and a login for parents at home.

4. Investing in the future: the DeepRoots Portal

We are building one online home for schools, families and our team. It replaces the mix of email, spreadsheets and separate tools we rely on today.

- **For schools:** Sign up, renew, pay and get set up online in one place. Teachers can be teaching within a day or two of joining instead of waiting a week.
- **For teachers:** Simple sign-in with Google or Clever, and help available right inside the portal.
- **For our team:** Routine paperwork happens automatically, so people spend their time on schools, students and curriculum instead of chasing forms.
- **For leadership and donors:** One live dashboard showing how many schools and students we serve, renewals and growth, always up to date.
- **Built to grow:** As we add grades and schools, the portal lets DeepRoots grow without overhead growing at the same pace.
- **Timeline:** Preview this month, first go-live in December 2026, and fully in place by March 2027.

5. How AI will help in the years ahead

- **Curriculum, faster:** AI helps our writers draft, align lessons across grades and insert Scripture automatically, so new grades and updates reach classrooms sooner. Every lesson is still written, reviewed and approved by our editorial team.
- **Help for teachers anytime:** Teachers get quick, accurate answers drawn only from DeepRoots-approved material, day or night.
- **Engaging media:** AI tools speed up video and graphics, so we can create more of the stories and visuals kids love.
- **Smarter decisions:** Clear insight into what schools use most, which helps us invest where it makes the biggest difference.

6. Where gifts make the biggest difference

- **Finish the portal:** Complete the remaining phases, especially the curriculum tools, so improvements reach students sooner.
- **New grades:** Finish Grade 8, launch PreK, then build Grades 9–12.
- **Engagement:** Expand Treehouse and the digital resources that keep kids excited about God's Word.

7. Measuring results

Until now, DeepRoots has not had a way to measure the time and cost behind its work. The portal changes that. From go-live, we will be able to show donors real results as they happen: schools served, how quickly they get started, renewals and growth.
